

Other Recommendations

1. A surveying Act should be legislated providing for participation of licensed professionals.
2. Projection System and Grid to be adopted for each state; to have one origin, one coordinate system and seamless data.
3. Metadata (data of data) should be compulsory. This will ensure seamless integration of data.
4. There should be Standardization of field procedures and accuracy.
5. Scales of survey needs to be specified.
6. A beginning needs to be made to have coordinate based cadastre.
7. In designing a LIS, content should be decided in consultation with other departments.
8. A Committee of experts we constituted with time bound mandate to implement the above recommendations.
